**Amendments to the Abstract:**

Please replace the Abstract on page 44 with the following amended Abstract:

## ABSTRACT

~~The present invention is directed to absorbent~~Provided are absorbent composites ~~comprising~~  
including superabsorbent materials~~material~~. The superabsorbent material has: an Absorption Time  
of about  $5+10a^2$  minutes or greater, where  $a$  is the mean particle size of the superabsorbent material  
in millimeters; a capacity of about 15 g/g or greater; a Drop Penetration Value of about 2 seconds  
or less; and, a  $\frac{1}{2}$  Float Saturation of 50% or less. ~~The present invention is further directed to~~In  
some aspects, fiber-containing fabrics and webs ~~comprising~~include the superabsorbent ~~materials~~  
material, ~~and their applicability in~~In other aspects, disposable personal care products include the  
superabsorbent material.
